Journal of Materials Processing Technology, 36 (1993) 479–481
Elsevier

Contents Volume 36

Vol. 36, No. 1, December 1992

Application of computer methods to the design and analysis of precision rib–web forgings
V.K. Jain, R.L. Goetz and C.M. Lombard (Dayton, OH, USA) 1
New method for determining sinh constitutive constants for high temperature deformation of 300 austenitic steels
A. Cingara (Novi Sad, Yugoslavia) and H.J. McQueen (Montreal, Canada) 17
New formula for calculating flow curves from high temperature constitutive data for 300 austenitic steels
A. Cingara (Novi Sad, Yugoslavia) and H.J. McQueen (Montreal, Canada) 31
Drawing of hemispherical cups with an annualr urethane pad
S. Thiruvarudchelvan and J.G. Gan (Singapore) 43
An investigation into the constant friction factor with the upper-bound flow function elemental technique
Y.-T. Lin and J.-P. Wang (Taipei, Taiwan, ROC) 57
Experimental investigation of a short-stroke device for deep drawing
S. Thiruvarudchelvan and F.W. Travis (Singapore) 69
Finite-element simulations in cold-forging process design
S. Tjøtta (Håvik, Norway) and O. Heimlund (Raufoss, Norway) 79

Diary of Events 97

Vol. 36, No. 2, January 1993

Publisher's Note i

Hot strength and microstructural evolution of 316 stainless steel during simulated multistage deformation by torsion
N.D. Ryan and H.J. McQueen (Montreal, Canada) 103
Experimental investigation of the through-feed centreless-grinding process
A.R. Naik, S.S. Pande and S. Somasundaram (Bombay, India) 125
A finite-element simulation of powder compaction confirmed by model-material experiments
N.V. Biba (Moscow, Russian Federation), H. Keife and U. Ståhlberg (Stockholm, Sweden) 141
An upper-bound analysis of the backward extrusion of tubes of complicated internal shapes from round billets
W.B. Bae (Pusan, South Korea) and D.Y. Yang (Taejon, South Korea) 157
An analysis of backward extrusion of internally circular-shaped tubes from arbitrarily-shaped billets by the upper-bound method
W.B. Bae (Pusan, South Korea) and D.Y. Yang (Taejon, South Korea) 175

Elsevier Science Publishers B.V.

A study of the method of evaluation of the frictional characteristics of Zn–Ni coated steel sheets
Y. Kim and W. Choi (Pohang, South Korea) 187
Numerical and experimental study of the thermal behavior of coining and upsetting processes
S. Shamasundar, A.A. Tseng, W. Aung (Philadelphia, PA, USA) and S.K. Biswas (Bangalore, India) 199

Call for Papers 223

Vol. 36, No. 3, March 1993

A review of methods of calculating machining temperature
A.A.O. Tay (Singapore) 225
A sensor for the detection of tool breakage in NC milling
Y.S. Tarng (Taipei, Taiwan, ROC) and B.Y. Lee (Yuenlin, Taiwan, ROC) 259
A new high-temperature test rig for optimization of materials for hot-rolling rolls
S.-E. Lundberg (Gävle, Sweden) 273
Investigation of flow stress and microstructure development in non-isothermal forging of Ti-6242
G. Shen (Columbus, OH, USA), S.L. Semiatin (Dayton, OH, USA) and T. Altan (Columbus, OH, USA) 303
KUSE – A computer program for 2D material-forming analysis
H. Keife (Stockholm, Sweden) 321
Suitability of sheet bending modelling techniques in CAPP applications
A.H. Streppel, L.J. de Vin, J. Brinkman and H.J.J. Kals (Enschede, The Netherlands) 339

Book Review 357
Diary Supplement 359

Vol. 36, No. 4, April 1993

Liquid phase sintering of T15 and T42 high-speed steel composites containing TiB_2
B.P. Saha and G.S. Upadhyaya (Kanpur, India) 363
The effect of strain rate on the mechanical behavior of Al–Si alloy
M.M. Moshksar (Shiraz, Iran) 383
Development of a CAD/CAM system for the drawing of hemispherical cups using flexible tools
J.G.K. Gan, S. Thiruvarudchelvan, N.H. Loh and D.T.H. Tan (Singapore) 395
Automatic generation of the cutting-tool path for free-form surfaces
D.Y. Yu, Z.C. Duan, H.D. Sun, P.G. Li, H.W. Ha and X.P. Li (Wuhan, China) . . . 415
Application of computerized slip-line-field analysis for the calculation of the lever-arm-coefficient in hot-rolling mills
K.Klarin (Stockholm, Sweden), J.-P. Mouton (Bromma, Sweden) and S.-E. Lundberg (Gävle, Sweden) 427
Intelligent processing of materials
S. Pickering (Petten, The Netherlands) 447

Short Communication
Temperature correction in compression tests
D. Zhao (Johnstown, PA, USA) 467

Letter to the Editor
A proposed new technique for detecting the roll-changing position of the spindles in rolling mills for quick work-roll change
A.S. Mahajan (Ranchi, India) 473

Acknowledgement of Referees 477
